

IRM GmbH – Location Vienna

The Viennese company is a leading software provider for system solutions in the liberalized energy markets for the commodity types:

- gas
- district heat
- electricity
- certificates
- oil
- coal

and for strategic planning.

The system solution **iOPT** is tailored to the requirements of the deregulated markets. As a complete integrated system **iOPT** offers support in all areas – from structured procurement management (forecast, energy disposition from simple registration and handling of the increasing number of procurement flows incl. schedule-/balance district management for VV2 and/or VVG) to energy trading with portfolio-/risk management

(incl. complex risk and optimization functionalities).

iPLAN is the solution for planning and analyzing complex questions related to energy technology and utilization. It consists of the DEMAND, INVEST, and IMPACT modules and represents the consequent development of IRM towards strategic and investment planning.

Initially, IRM AG was founded as a limited liability company in 1998. Commercial operation began in 1999 with 11 employees. Now the IRM GmbH established itself as a leading solution provider in Europe with more than 40 references in 16 countries and a staff of over 70.

Through continuous development and formulation of new concepts and solutions, we see the customer's satisfaction and confidence in our service as our highest priorities.
